

Acer p. Trompenburg

**BOUNTIFUL
FARMS**

Trompenburg Japanese Maple is a fast growing palmatum selection. The vase shaped young tree will become broad as it matures. Strikingly unusual foliage of 7-9 pointed, sharply serrated, lobed leaves. Spring leaves emerge red, turning to dark purple in the summer then to a brilliant scarlet-red in the fall. Tolerates full sun well, but best leaf color is achieved in partial shade.
